

HU IN ITALY

A STUDY ABROAD TESTIMONY BY KATHERINE SAINT-PREUX

Living for a month in a different country was a privilege that I aspire to recreate through my academic and personal goals. For the entirety of the month I had the opportunity to immerse myself in the culture of each city I explored and appreciate the Italian teaching style. The two courses I took encouraged me to revisit topics on a deeper level. For example, the first course "The (Geo)Politics of Organized Crime " provided me the platform to research, recontextualize, and spread awareness about the political and economic issue in my parent's home country, Haiti. I can proudly say that the experience has had a positive impact on my life and has inspired me to redefine my own perception of success.
